PROFESSIONAL SUMMARY

Early career business and technology professional (Seneca Bachelor of Commerce, 3.7 GPA) with consultative sales experience in telecom and electronics retail and regulated healthcare, and a work term project that identified a \$9,000 per month upsell opportunity and took it to senior management. Builds AI automation for outbound lead research and runs a Docker and Linux infrastructure lab, so comfortable discussing technical capabilities with engineers and founders. Looking to grow into B2B business development in the tech hub and innovation ecosystem.

EXPERIENCE

Business Analyst, Retail Operations, Specsavers, Toronto, ON

May 2026 to Sep 2026

Cooperative education work term

- Identified and sized a **\$9,000 per month** revenue opportunity in optical treatment sales (upsell at point of care) and presented the business case to senior management.
- Audited the patient handover process and uncovered a **40 to 60% drop** in lens treatment recommendations, pinpointing where revenue was being lost in the customer journey.
- Built a revenue model from raw transaction data with daily, weekly and monthly targets using a **\$60 per pair** baseline.
- Partnered with store leadership on a standardized recommendation process that cost nothing to run, and built dashboards so managers could track activity against sales goals.

Eye Care Consultant, Specsavers, Toronto, ON

May 2025 to Present

- Advise customers on clinical and product options, translating technical detail into clear value so they can decide with confidence.
- Act as the point of contact between customers, clinicians and back office systems, keeping information accurate in a regulated environment.

Sales Associate, Best Buy, North York, ON

Aug 2024 to Jun 2025

- Ran needs assessment conversations and product comparisons across electronics and telecom, guiding customers to confident purchase decisions in a high volume environment.
- Worked with supervisors to identify peak hour bottlenecks and proposed changes to improve customer flow.

PROJECTS

- **AI Outbound Sales Pipeline:** Designed a workflow hosted on my own server (n8n, Gemini, PostgreSQL, Browserless, Docker) to automate prospect research and enrichment for outbound outreach.
- **Home Server Infrastructure Lab:** Run a multi service Docker environment on a Tailscale mesh network (Linux and Windows server administration, virtualization).
- **Analytics Portfolio (jmayor10.github.io/Portafolio):** Power BI dashboards, Azure cloud applications, chatbot development and data analytics.

EDUCATION

Honours Bachelor of Commerce, Business Technology Management, Seneca Polytechnic

Expected Apr 2027

GPA 3.7

Postgraduate Certification, Applied AI and Process Optimization, UTAMED (30 ECTS)

Apr 2026 to Oct 2026

Enterprise AI tools, workflow automation, applied machine learning for business
